

EDUCATION CHOICE CAMPAIGN

Fund Students Not Schools!

"...one survey found that 80 per cent of those who passed Class V from Municipal Corporation of Delhi schools in Delhi could not read or write, drop-out ratios are as high as 40 per cent in primary schools and go up to around 70 per cent by secondary school."

Business Standard, April 20, 2005

Do you know how much city governments in India spend per child on education? It's Rs 1000-1700. Not per year...per MONTH! Imagine that sum in the hands of the poor parent and the quality of education that her child would receive!

The Education Choice Campaign aims at making available to the poorest children quality education that has so far been out of their reach. The government has

been running and managing schools for more than 50 years and the results are for us to see!

The 3-pronged approach....

Education Vouchers

An education voucher is a coupon offered by the government entitling a student to take education at any school of his choice.

Empowers poor students to exercise the same choice as the richer students

Creates competition among schools to enhance efficiency, learning and development

Deregulate Education

Abolish licence-permit raj in opening and running schools

Empowers schools to design and offer programs to meet the diverse needs of students

Edupreneurship

Declare education as an industry to enable access to credit

Offer venture capital and mentoring to individuals/ cooperatives to open and expand schools

Empowers educational entrepreneurs to fulfil their passion for the cause of education

**The future of more than a hundred million children
is in your hands. GET INVOLVED!**
